REPORT

OF THE

BOARD OF ADMINISTRATORS

OF THE

CHARITY HOSPITAL.

*To the Hon. Senate and House of Representatives,
of the State of Louisiana :*

In accordance with custom and the requirements of law, the Board of Administrators respectfully submit to your Honorable Bodies the following Report on the Condition and Management of the Charity Hospital of New Orleans, for the years 1850 and 1851 :—

During these two years our City has been more than usually exempt from its customary scourge, *Yellow Fever*, but not free from that terrific pestilence, *Asiatic Cholera*. This disease prevailed to an *epidemic extent* in the spring and autumn of 1850, causing a great increase of patients in the Hospital, but during the last year its destructive force gradually declined, until it now may be said to have almost vanished. The year 1859 is generally considered the healthiest ever experienced in New Orleans, yet the accompanying documents will show that the number of admissions into the Charity Hospital was never greater, excepting the year previous. This extraordinary increase of applicants for admission into this Hospital would appear to indicate an extent of *indigence and affliction* in our midst that but illy accords with the apparent prosperity of our citizens, and suggests the necessity of material reform in its administration ; but before dilating upon this point, we would invite your attention to the following brief summary of the transactions and finances of the Hospital since we last had the honor to address you.

It will appear from the accompanying document that, in the year 1850,

The number of patients admitted was	-	-	-	-	-	18,476
Do. do. discharged,	-	-	-	-	-	13,989
Do. do. died,	-	-	-	-	-	1884
The cost of maintenance of the Hospital for the year 1850 was	-	-	-	-	-	\$69,783 87
Whilst the payment and expenditure amounted to	-	-	-	-	-	89,127 56
The gross income for this year, including the State appropriation, was	-	-	-	-	-	84,711 42
The debts due by the Hospital, 31st December, 1850,	-	-	-	-	-	22,380 82
The debts due to the Hospital,	-	-	-	-	-	14,570 14
Number of patients from foreign countries,	-	-	-	-	-	16,598
Do. do. United States,	-	-	-	-	-	1774
Do. do. unknown,	-	-	-	-	-	104
Together,	-	-	-	-	-	18,476
Of which number there were from the State of Louisiana	-	-	-	-	-	264

For the year 1851—

Number of patients admitted,	-	-	-	-	-	-	-	18,420
Do. do. discharged,	-	-	-	-	-	-	-	16,777
Do. do. died,	-	-	-	-	-	-	-	1871
The cost of maintenance was	-	-	-	-	-	-	-	\$67,074 48
Payments and expenditures during the year,	-	-	-	-	-	-	-	66,575 70
The gross income for the year, including the State appropriation, was	-	-	-	-	-	-	-	66,504 91
Debts due by the Hospital,	-	-	-	-	-	-	-	23,853 45
Debts due to the Hospital,	-	-	-	-	-	-	-	16,159 28

Of this last amount, nearly three-fourths are considered unavailable, leaving the indebtedness of the Hospital about \$20,000 at this time.

The number of patients from foreign countries,	-	-	-	-	-	-	-	16,563
Do. do. United States,	-	-	-	-	-	-	-	1726
Do. do. unknown,	-	-	-	-	-	-	-	291

Together, - - - - - 18,420

Of which number there were from Louisiana only - - - 241

It will be perceived from the accompanying table that the principal resource of the Hospital is the *tax on passengers*, and that the number of arrivals and the amount collected in the two years were about the same. It is not to be disguised, however, that we have met with some difficulty in the collection of this just and important tax; and we would respectfully suggest to your Honorable Bodies the propriety of instructing our Senators and Representatives in Congress to endeavour to have a law passed authorising this tax, and giving the proceeds to the principal seaport cities of the Union, for the support of Hospitals. As the cities of New York and Boston have experienced like difficulties, there can be no doubt that their Representatives in Congress would cheerfully co-operate in obtaining the passage of such a law. Indeed, we see no reason to apprehend opposition from any quarter. The annual expense of maintaining this institution has now become so great that, if deprived of this important resource, we should be compelled to exclude at least three-fourths of those who have been accustomed to its benefits.

The wear and tear of so extensive an establishment as the Charity Hospital must necessarily demand occasional and costly repairs. Encouraged by the liberality that has ever been displayed towards the institution by your Honorable Bodies, on the representation of its wants by the Board of Administrators, we beg leave to state that the buildings at this time require repairs that are estimated to cost \$12,500; and there are other necessities that will demand \$2,500 more. We, therefore, trust that you will grant us an appropriation of \$15,000 to cover these expenses, and that you will not be unmindful of the debt of \$23,853 45 now pressing upon us, and requiring prompt payment. We would also respectfully suggest to your Honourable Bodies the necessity of making provision for the wants of the Hospital in 1853. As the Legislature does not meet in January next, it would be well at the present Session to make an appropriation equal to our wants in said year. You may rest assured that the money will be devoted to the best interests of the institution confided to our charge.

It may not be amiss to mention in this place an unusual tax to which we shall hereafter be subjected. Heretofore the establishment has been supplied with water *gratuitously* by the Water Works Company; but as this company has recently been subjected to heavy taxation, they, in turn, have notified us that they will demand of us \$500 a year for the supply of water to the Hospital. Under the circumstances, we cannot deny the justice of this demand; yet we are but poorly able to meet it. We have now fixed plugs and water works, which will enable us to keep the buildings

entirely safe from all danger of fire, as soon as we obtain the means of procuring some twelve hundred feet of hose, which will cost about eight hundred dollars.

In several of our previous reports to the Legislature, so far back as 1847, the Board of Administrators have endeavored to impress upon your Honorable Bodies the urgent necessity of establishing in the suburbs of New Orleans another institution, combining the properties of an *Almshouse* and *Hospital*, for the reception and treatment of contagious diseases, such as *Small Pox* and *Ship Fever*, the entertainment of *helpless* and *incurable pauper* invalids, and the employment of the numerous able-bodied beggars and vagrants who infest every large city.

Small Pox and Ship Fever are diseases that never would be seen amongst us unless introduced from abroad; and as it is presumed the Charity Hospital was founded mainly for the relief of *our own* indigent people, it is evidently unjust where they accept our proffered kindness to expose them to dangers and calamities far greater than those which drove them to our doors. Numerous instances have occurred where the unfortunate poor have been admitted into this Hospital for a broken limb or some ordinary complaint, and have ultimately fallen victims to Ship Fever or Small Pox, then prevailing in the house. Beside this, the medical attendants, Sisters of Charity, and nurses, have alike suffered from these exposures, to say nothing of the instances in which contagious diseases have been carried from the Hospital into the midst of the citizens.

The Grand Jury of this Parish state in their last report, (Jan. 28,) that "they found in the Charity Hospital 890 patients, of whom 15 are blind, 7 insane, 10 afflicted with, small pox, 150 indigent persons, and 9 orphan children—making in all 190 persons who ought to be removed to a more suitable place." This statement fully sustains the correctness of our remarks on this point. A hospital devoted to the treatment of disease is an improper asylum for incurable patients, helpless children, or indolent vagrants.

The present location of the State Lunatic Asylum renders it imperative on the Legislature to make some additional provision for the reception and treatment of the insane. As it is, our Hospital, as well as the city prisons, are constantly cumbered with these unfortunate beings, without any preparation for their proper treatment. All the large cities of the United States, excepting New Orleans, have provided almshouses, where the blessings of Christian benevolence are gratuitously dispensed to the helpless and homeless pauper; and they are managed, too, with such economy as to prove but a light burthen to their founders. That the same could be effected in this place, and that it is loudly called for by the wants of the community, cannot for a moment be questioned. We repeat the recommendation expressed in our last report, that the State, in connection with the City Councils, should purchase the Franklin Infirmary, which is situated on the Pontchartrain Railroad, at a convenient distance, and easy of access at all times. The grounds are perhaps not so spacious as could be desired, but the buildings are sufficiently extensive, and well adapted to the purpose. Here could be provided a proper place for the reception and treatment of contagious diseases, an asylum for incurables and orphans, and profitable employment for such vagrants as are able, but unwilling, to work.

To recur now to the vast increase of patients in this Hospital within the last few years. In 1845 the number of admissions was 6,136; whilst in 1851 it was 18,420. If the benefits of this Hospital were strictly confined to its legitimate object, *i.e.*, affording relief to the *indigent sick*, this would go to show an increase of *pauperism and disease* amongst us that would be truly appalling. But there can be no doubt that our charity has been misapplied upon thousands of persons who have gained admission into the Hospital under the plea of *poverty*, whilst they were able to provide for their own

necessities in sickness. The surrounding States, as well as others who have easy access to our city by means of our extensive inland navigation, have been too much in the habit of throwing their pauper invalids upon our hands, and it must be stopped. We are determined in future to make more rigid inquiries into the pecuniary condition of the applicants, and to make every effort to correct the evil both at home and abroad. Besides the imposition thus practised upon the liberality of the State, gross injustice is done to the medical profession of New Orleans, who, with that noble philanthropy which has ever characterised its enlightened members, have attended, at the call of the Board, within the last two years, nearly 37,000 patients, *without charge*. 'Tis enough to tax their benevolence with the care of the *really indigent* in time of sickness, without taking the very bread out of their mouths for the benefit of imposters.

We cannot omit this occasion to bestow a merited tribute upon the physicians and surgeons who have performed the medical service of the Hospital during the last two years. They have ever been kind, prompt, and attentive to the duties assigned them, and deserve at your hands a more substantial acknowledgment than this Board has it in its power to bestow.

This institution, the largest hospital for the reception and treatment of patients in America, presents an admirable field for the study of disease, and is a valuable acquisition to our Medical College, the Professors in which are allowed every facility they desire during their course of lectures. We have ten resident students in the Hospital, who are furnished board and lodging, and are required to execute the orders of the visiting physicians and surgeons. We venture to assert that those of them who remain their full period of two years go forth with a better stock of practical knowledge and experience than any young physicians in the country.

We will close this report with an earnest appeal to your Honourable Bodies in behalf of the *pressing wants* of the institution you have placed under our control. All which is most respectfully submitted.

HENRY BIER, *Secretary*.

H. B. CENAS, *Vice President*.
